WHAT YOU'LL NEED

- Free Slide
- Techni-Strand Kokanee Bumper Leader
- Arrow Flash - OR - Cousin Carl Lake Troll
- Arrow Spin or Wild Weasel
- Cannonball weights or similar

HOW TO RIG

Arrow Flash

From your mainline,

1. String on the Free Slide with the dropper snap closest to your rod tip
2. Tie your mainline directly to the Free Slide bead chain
3. Attach the duo-lock of your Techni-Strand to the Free Slide bead chain
4. Clip an Arrow Flash Dodger to the bead chain/duo-lock end of the Techni-Strand
5. Clip on an Arrow Spin or Wild Weasel

Cousin Carl

From your mainline,

1. String on the Free Slide with the dropper snap closest to your rod tip
2. Tie your mainline directly to the Free Slide bead chain
3. Using a duo lock, attach the snap swivel of your Cousin Carl to the Free Slide bead chain
4. Clip on an Arrow Spin or Wild Weasel

FLAT-LINE/TOP-LINE

Kokanee & Trout Trolling with Poulsen Cascade Tackle

NO DOWNRIGGER NEEDED

TECHNIQUES & PRESENTATION

TROLLING: *Arrow Flash Dodgers* run at a wide range of speeds, from approximately 0.6-1.8MPH. On average, 1.0-1.7MPH is a great range to start with. Let the fish tell you what speed presentation they want that day! *Cousin Carl Lake Trolls* will run at virtually any troll speed, so experiment to see what the fish respond to that day.

LEADER: When trolling the *Arrow Spin Micro Spinner* behind an *Arrow Flash Dodger*, running a leader length from 6-16" can be very successful, with 8-10" often being the sweet spot. When trolling a *Wild Weasel* behind an *Arrow Flash*, slightly longer leader lengths are generally used, usually 10-16" in length. When trolling a *Cousin Carl Lake Troll* with an *Arrow Spin* or *Wild Weasel* behind, you can use leader lengths up to approximately 24".

BAITING: Both the *Arrow Spin* and *Wild Weasel* have fish-catching action of their own, but to make your presentation even more irresistible, tip your hooks with your favorite Kokanee or Trout bait. Be careful- too much bait can add drag or block the point of the hook.

FLAT-LINE/TOP-LINE

KOKANEE & TROUT TROLLING

WITHOUT A DOWNRIGGER

FREE SLIDE

- Spreader and a slider in one
- Keeps your lead off your mainline
- The tube is both chemical and shatter resistant and slides well on braid or mono without grooving

TECHNI-STRAND KOKANEE BUMPER

- American made coated stainless steel and stainless steel snaps
- Duo-Locks on both ends for quick and easy gear change out
- Shielded crimps and very kink-resistant
- Strong bumper = less loss of gear

ARROW FLASH DODGER

- Side-to-side swinging action in almost a 180° U shape
- Ready to run right out of the package - no tuning needed
- Works well at a wide range of trolling speeds or river currents
- Adds an enticing action to your bait or lure

ARROW SPIN

- Uses the time-proven Bear Valley spinner blades
- Leader is designed with 12lb test Maxima monofilament leader line, premium beads, and quality hooks
- Made in top fish catching colors

PRO TIP: Don't put a bumper bead between the Bead Chain and Free Slide - this will defeat the line-twist reduction & knot protection properties of the Free-Slide design.

Swivel-Grip Grooves straddle your knot to protect it and lock the end of your swivel to prevent line twist from transferring to your mainline

COUSIN CARL

- Blades spin in opposite directions and line up at various intervals creating a counter-rotational double flash effect
- Effective even at very slow trolling speeds

WILD WEASEL

- Quick and erratic action - flips and flitters wildly
- American made stainless steel split-rings
- Solid brass blank with ultra UV finishes
